Thank you very much for affording me the opportunity of taking a sabbatical leave for the 2015-2016 academic year. This report covers my activities during this time period. I have included my sabbatical leave application, the sabbatical leave decision letter, and a log of my activities in this report.

This sabbatical provided me an opportunity to concentrate on research and professional development. My current research topics are Alzheimer’s disease and related dementia, and nutrition. I was fortunate to obtain a partnership grant of $27,400 from the Alaska Mental Health Trust Authority to obtain six licenses of the Java Memory Care Program, and train staff to implement the Program in the six Pioneer Homes in Alaska. This Program is the first standardized music therapy program to address loneliness and depression in residents with memory change, emphasizing mutual support in a group setting. The Program in the Anchorage Pioneer Home is a year long control group study measuring the effectiveness of the Program. It ended June 2016 and is now being evaluated. I completed and published a research article in the *Journal of Alzheimer’s & Neurodegenerative Diseases* regarding earlier work done at the Salvation Army’s Serendipity Adult Day Center. A second article regarding lifestyle and Alzheimer’s disease was submitted to *Dementia: The International Journal of Social Research and Practice*.

In respect to nutrition, I submitted a grant application to National Institute of Health for Cutting-Edge Basic Research Awards for Sobriety Nutritional Therapy Project. I also published an article regarding the use of sobriety nutritional therapy in the treatment of opioid addiction in the *Journal of Addiction Research & Therapy*. Other writing includes a 59-page chapter entitled “Social services and corrections: Intergovernmental, public and private policy-making, and power dynamics, in an edited book by Dr. Clive Thomas called *Alaska Politics and Public Policy: The dynamics of beliefs, institutions, personalities, and power*. This book was published August 1 by the University of Alaska
Press. Two Commentaries were published in the Anchorage Dispatch News: “Alaska would be better off with its own single-payer health care system” and “How to fatten Alaska’s wallet by way of its stomach”.

During my sabbatical I was a “Social Determinants of Health Workshop” presenter at the State of Reform Health Policy Conference in Anchorage. I also presented at the Urban in Alaska Conference held at UAA and featured the Java Music Club Project funded by the Center for Community Engagement and Learning. I arranged and hosted Alaska Commissioner for Health and Social Services, Valerie Davidson, at the Social Action Committee Luncheon that was part of the Alaska Chapter NASW Conference. I also arranged and hosted a presentation by Kristine Theurer, the music therapist that created the Java Music Club and Memory Care Programs, at a meeting held at the AK Mental Health Trust Authority for geriatric service providers in Alaska. Other presentations were: The Java Music Club Program at the Alaska VA Health Care System Medical Center, Long Term Care Division. Presentation of the Java Music Club Program and implementation design to the Alaska Commission on Aging Legislative Meeting in Juneau, Alaska, and to the Care Coordinators of the Alzheimer’s Resource of Alaska agency.

In terms of professional development, I completed my second nutrition semester course from UAA’s Dietetics and Nutrition Program. I obtained a Certificate in Plant-Base Nutrition from the T. Colin Campbell Center for Nutritional Studies through eCornell. I completed a Certificate in Advanced Clinical Dementia Practice from the University of Michigan School of Social Work. I am participating in the Alaska Geriatric Interdisciplinary Leadership Development Faculty Track which included participating in the Nuka System of Care Core Concepts training and Conference hosted by Southcentral Foundation. Other conference attendance included the Natural Path Conference hosted by the Ionia Community at Kenai Peninsula College; the AK NASW Conference; ePathways Faculty “Makerspace” Conference, UAA; Alzheimer’s Disease Workshop, Providence Hospital; Excellence in Dementia Care: Enhancing Well-being & Improving Living Spaces workshop, sponsored by Alzheimer’s Resource of Alaska, Senior Center; and Social and Environmental Determinants of Health in Alaska Symposium, Anchorage, AK. Lastly, I attended two presentations on nutrition and acupuncture while on a cruise to the British Virgin Islands.

Providence Hospital Extended Care facility and Horizon House were in attendance at the presentation by Kristine Theurer at the Mental Health Trust Authority and expressed an interest in the Java Music Club and Memory Care Programs. My plan is to contact them in the near future regarding implementation of the programs in their facilities. My project for the Alaska Geriatric Interdisciplinary Development Faculty Track is to implement the Java Music Club Program at Southcentral Foundation as one of their Learning Circles for elders. I also plan to create an interdisciplinary course in the College of Health regarding therapeutic nutrition across the lifespan.

All in all this was the most enjoyable and successful sabbatical to date, as evidenced in my activities log, and I am grateful for the opportunity to shine!
January 14, 2015

Patrick Cunningham
Associate Professor
School of Social Work, College of Health

Dear Professor Cunningham:

The Faculty Grants and Leave Committee and your Dean have endorsed your request for sabbatical leave for the 2015-2016 academic year. Based on the substance of your proposal, the prior recommendations, and having reviewed your proposal and all documentation, I concur with their recommendations.

On behalf of Chancellor Case, I am pleased to confirm that, contingent upon funding from the College of Health, you are awarded a sabbatical leave for the 2015-2016 academic year to pursue the submitted proposal entitled: “Java Music Club: Mutual Support for Cognitively Impaired At Risk Adults.”

The actual management and financing of the sabbatical is delegated to the deans and directors who are responsible for determining the budget implications of this sabbatical. If your sabbatical leave is funded, you will be paid at a rate equal to two-thirds salary for the academic year. Sabbatical leave obligates you to return to UAA for one year of service or repay the salary and benefits received during the leave. Any additional compensation such as fellowships, grants-in-aid, or earned income to assist in accomplishing the purposes of the leave must be approved in advance by the Chancellor who may adjust the sabbatical leave salary to reflect such income (BOR Policy 04.04.06.A.4).

The Board of Regents Policy (04.04.06.A.7) requires that you submit a report to this office detailing your professional activities and accomplishments for which the leave is granted and specifying the sources and amount of any additional funds secured for this leave period. Please attach the report to a copy of your proposal and submit to your dean or director for his or her review and comment prior to forwarding to the Office of Academic Affairs by September 15, 2016.

In recent years, the Alaska Legislative auditors have examined the sabbatical reports. I, therefore, urge you to give special care and attention to this report in addressing the goals and objectives of the proposal and the actual results of the sabbatical. Any revisions to your original proposal must be submitted through your dean or director to this office for approval in advance.

Faculty members with active external grants and contracts will be expected to make arrangements for satisfactory administration during their absence. Contact the Grants and Contracts Office at 786-1569 for external agency requirements regarding changes in key personnel, PI or co-PI absences, or substantially less effort to be devoted to projects. Please note that for faculty members receiving external funds, sabbatical leave in combination with other compensation may not exceed 100 percent of your regular salary, per federal regulations.

You are strongly encouraged to review the attached notice and to contact the Alaska Division of Revenue concerning your Permanent Fund eligibility, if you have questions. Please contact Human Resource Services if you have any questions concerning the continuance of your benefits or the effect on your retirement programs while on leave.

Congratulations for the excellent application and committee endorsement. Your plan appears as though it will be personally enriching and valuable to the university. We look forward to reading your final report. You have my best wishes for a productive and enjoyable sabbatical.

Sincerely,

Sam Gingerich
Interim Provost
